

“The Stinger” Backpack Anaesthesia Machine

Need a field anaesthetic machine that’s lightweight, waterproof, designed for portability and ease of maintenance?

Developed over 10 years, and road tested in some of the most rugged conditions in Australia and Antarctica, the AAS Back Pack Stinger™ is the answer for field anaesthesia. It’s tough, reliable and will go anywhere.

The Stinger™ Back Pack in use

“I needed a portable anaesthetic machine for the work that we do here on Macquarie Island in the Sub Antarctica where we are involved with seal anaesthesia etc etc

The Stinger™ Back Pack is great

Dr. John Arnould, Research Fellow at the ANU Centre for Resources and Environmental Studies, ACT

Dr. Simon Goodworthy with an Australian Fur Seal - Macquarie Island

Back Pack features include:

- Sealed, water resistant, shatterproof polypropylene case
- Mounts on Back Pack frame
- Machine easily removable for bench top use
- Virtually maintenance free*
- All parts replaceable in the field
- Both circle and non-rebreathing systems

*Does not apply to vaporiser maintenance requirements

All stinger models available with your choice of vaporiser and anaesthetic agent
